

Market Update

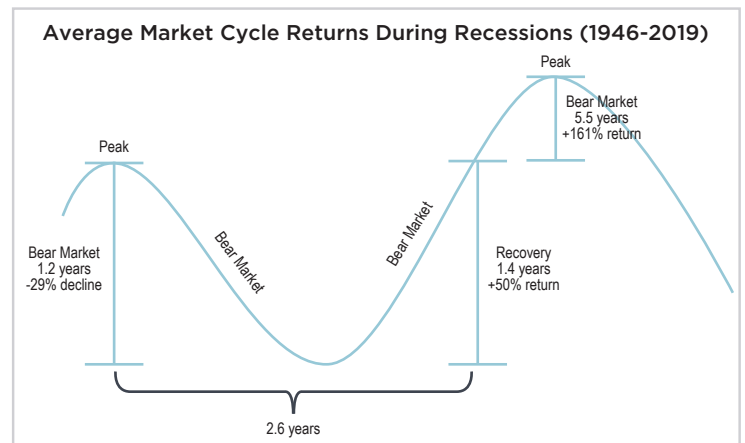

The last 5 weeks have been unprecedented for all of us. No matter how much you have experienced in your investment life, this one surprised you. Until February, we were humming along quite nicely with positive outlooks for our economy and therefore the stock market. Then the coronavirus arrived on our shores, which initiated an immediate stoppage of the entire global economy and dramatic declines in stock markets across the world. It brought with it such chaos that for a brief moment Treasury bonds were not even safe anymore and credit markets froze creating huge dislocations. The investment implications would certainly have been much worse had governments around the world not intervened. Fortunately, the Federal Reserve and the government acted swiftly to inject liquidity into the system and to provide bridge loan financing to businesses and individuals to hopefully get us to the other side of this crisis. The government reaction happened more quickly than it did in 2008, inserting hope into the minds of investors and allowing the market to stabilize and move higher as we finished out the quarter. It was a tough quarter for risky assets, but the S&P 500® held up better than most, bolstered by growth stocks in the technology and healthcare sectors. Despite the difficult quarter, the S&P 500 remains above where it was at the beginning of 2019. Treasury bonds were one of the few assets with positive returns along with gold. The chart to the right shows the returns for different asset classes for 2019 and the first quarter of 2020. It also shows the returns for each from the market peak on February 18 to its low point on March 23. You can see that small and mid-cap stocks were hurt worst due to a greater reliance on debt while international markets performed similarly to the S&P 500.

Asset Category	2019	2/18/2020 to 3/23/2020	Q1 2020
U.S. Large Cap Stocks	31.49%	-33.66%	-19.60%
U.S. Mid Cap Stocks	30.54%	-40.19%	-27.07%
U.S. Small Cap Stocks	25.52%	-40.49%	-30.61%
Developed International Stocks	22.01%	-32.95%	-22.83%
Emerging Market Stocks	18.42%	-31.43%	-23.60%
U.S. Value Stocks	26.54%	-38.27%	-26.73%
U.S. Growth Stocks	36.39%	-31.01%	-14.10%
Interm Corporate Bonds	10.14%	-8.77%	-3.15%
Interm Treasury Bonds	5.22%	3.64%	5.25%
High Yield Bonds	14.32%	-20.67%	-12.68%

A Look Back

The chart to the right shows the trajectory of the typical recessionary bear market. On average, the market declines 29% in about 1.4 years. From February 18 to March 23, the market declined 33.7%, marking the fastest 30%+ drop in history. By the end of the month, however, it had recovered more than 15%, ending the quarter down 19.6%. Many people are expecting the market to retest that low, which could extend this bear market much further as we digest the fundamental and economic bumps that we are sure to face in the coming months. In addition, we believe the upcoming election will certainly cause additional volatility in the market. We will never be able to accurately pinpoint the bottom of a bear market. It might have already happened or it might be months away, but with the right asset allocation and risk profile, you should be able to manage through it and remain invested for the long-term without feeling the urge to jump in and out of the market. Ultimately, the market may reward you with positive returns and even those with bad timing that invest at a market peak could generate solid returns over time.

Source: Davenport Asset Management; Morningstar Direct; market returns represented by the S&P 500 Index

First Quarter Portfolio Activity

Periods of extreme volatility and fear often present opportunities to upgrade the holdings as well as the risk-return profile of a portfolio. You may have noticed during the quarter that we took advantage of some of these situations in your account. On February 25, we conducted our annual rebalancing across all accounts. Rebalancing is intended to automatically sell some of the best performing holdings in your account to buy some of the underperforming assets. Due to the large market gains of 2019, most accounts were over their targeted weighting in equities so overall we were trimming stock holdings to add to bonds and cash. Additionally, we made two fund changes:

- Replaced American Funds Amcap with Federated Kaufmann Large Cap in more aggressive models to increase the exposure to more growth oriented technology and healthcare sectors
- Replaced FMI Large Cap with Vanguard Equity Income in more conservative models to lower expenses and increase dividend income

With fears of the mandated shutdown of our nation's economy boiling over, the S&P 500 Index declined over 30% in just a few weeks. So on 3/18/2020, we opportunistically increased stock weightings back to their original targets by reducing intermediate term bonds and adding to the Hartford Core Equity fund. At the same time, we replaced the Dodge & Cox International fund with the MFS International Diversification fund, which we believe will provide lower volatility exposure to the international markets. We believe these changes will upgrade the quality of our portfolios in preparation for any of the outcomes that may come our way in the next several months.

A Changing World

Suffice it to say, the world is a different place than it was at the time of our last quarterly update. Much of America is closed. We are working from home, wearing masks to the grocery store, spraying packages with Lysol, doing puzzles, binging on Netflix and finding comfort in hoarding toilet paper. Meanwhile our kids are being treated to "virtual learning", having FaceTime playdates, and finding imaginative ways to entertain themselves. Personal space has indeed taken on a completely new meaning and takeout has become a special treat rather than a daily occurrence. The coming months are likely to be marred by terrible economic data, companies going out of business or filing for bankruptcy, increased unemployment, and investigations and lawsuits based on hindsight criticisms of how the situation was handled. However, we hope that there will be some good that comes from all of this that could include a greater appreciation for a slower pace, more walks and exercise, increased telecommuting, environmental improvements, more diversified supply chains to prevent disruptions, more imaginative young people, and increased preparedness for future pandemics. Regardless of the outcome, we think that having an appropriate asset allocation with a risk profile that allows you to remain invested and still sleep comfortably at night is the most important decision you can make.

Performance shown is historical and is no guarantee of future results. Please see page 4 for Important Disclosures and Index Definitions.

You should consider each mutual fund's investment objectives, risks, charges and expenses carefully before investing. Each mutual fund's prospectus contains this and other important information, should be read carefully before investing or sending money, and can be obtained by contacting your Investment Executive, or by calling (800) 846-6666. The investment return and principal value of an investment will fluctuate. An investor's shares, when redeemed, may be worth more or less than their original cost. Investing in securities carries risk including the possible loss of principal.

Important Disclosures

¹Hartford Administrative Services Company ("HASCO"), the Fund's transfer agent, has contractually agreed to waive and/or reimburse a portion of the transfer agency fee to the extent necessary to limit the transfer agency fee for Class Y as follows: 0.08%. This contractual arrangement will remain in Effect until February 28, 2021 unless the Board of Directors of The Hartford Mutual Funds, Inc. approves its earlier termination. ²Touchstone Advisors, Inc. (the "Advisor" or "Touchstone Advisors") and Touchstone Strategic Trust (the "Trust") have entered into a contractual expense limitation agreement whereby Touchstone Advisors will waive a portion of its fees or reimburse certain Fund expenses (excluding dividend and interest expenses relating to short sales; interest; taxes; brokerage commissions and other transaction costs; portfolio transaction and investment related expenses, including expenses associated with the Fund's liquidity providers; other expenditures which are capitalized in accordance with U.S. generally accepted accounting principles; the cost of "Acquired Fund Fees and Expenses," if any; and other extraordinary expenses not incurred in the ordinary course of business) in order to limit annual Fund operating expenses to 1.04%, 1.79%, 0.79%, and 0.69% of average daily net assets for Classes A, C, Y, and Institutional Class shares, respectively. This contractual expense limitation is effective through July 29, 2020, but can be terminated by a vote of the Board of Trustees of the Trust (the "Board") if it deems the termination to be beneficial to the Fund's shareholders. The terms of the contractual expense limitation agreement provide that Touchstone Advisors is entitled to recoup, subject to approval by the Board, such amounts waived or reimbursed for a period of up to three years from the date on which the Advisor reduced its compensation or assumed expenses for the Fund. The Fund will make repayments to the Advisor only if such repayment does not cause the annual Fund operating expenses (after the repayment is taken into account) to exceed both (1) the expense cap in place when such amounts were waived or reimbursed and (2) the Fund's current expense limitation. Investors pay the net expense ratio of the fund. Please refer to the fund's prospectus for more information. ³Investors pay the net expense ratio of the fund.

Diversification and Asset Allocation does not ensure a profit or guarantee protection against a loss. It is important to note that short-term and trailing performance will fluctuate. We expect all of the funds at some point to experience underperformance versus their benchmarks and peer groups. However, we believe that our research process has helped us identify funds that are likely to perform well over the long term. Our decision to remove a fund is not based on short-term performance, but on in-depth analysis using our Monitoring Criteria. The mutual fund categories are determined by Davenport using a combination of Morningstar categories and a returns-based style analysis provided by Zephyr StyleADVISOR.

An index is not available for direct investment; therefore its performance does not reflect the expenses, fees and taxes generally paid with the active management of an actual portfolio.

Risk Considerations: International funds invest primarily in equity securities of issuers outside the United States. International investments are subject to additional risks such as currency fluctuations, political instability, and the potential for illiquid markets. Funds that invest in foreign securities may involve greater risks, including political and economic uncertainties, as well as risk of currency fluctuations. Investments in emerging markets come with much greater risk due to political instability, domestic infrastructure problems, currency volatility and limited equity opportunities, as many large companies may still be "state-run" or private. Small and mid cap company stocks may be more volatile than stocks of larger, more established companies. Investments in bonds and other fixed income securities may fall in value if interest rates change. Generally, the prices of debt securities rise when interest rates fall, while their prices fall when interest rates rise. Longer term debt securities are usually more sensitive to interest rate changes. An issuer suffering an adverse change in its financial condition could see the credit quality of its securities deteriorate, leading to greater price volatility of the security. Funds investing in lower quality debt securities are more susceptible to these problems and their value may be more volatile.

Upside Capture Ratio measures a manager's performance in up markets relative to the market (benchmark) itself over the preceding 10-year period. **Downside Capture Ratio** measures a manager's performance in down markets relative to the market (benchmark) itself over the preceding 10-year period. **Gross Expense Ratio** is the total annual operating expenses of a fund divided by its average net assets. **Net Expense Ratio** is the total annual operating expenses of a fund, less any fee waivers, divided by its average net assets. This is the expense ratio actually charged by the fund for the previous fiscal year.
