

Stocks started the year down 4.6% (as represented by the S&P 500® Index) in the first quarter, which felt pretty good considering we were grappling with rising inflation rates, the beginning of an interest rate hiking cycle by the Federal Reserve, a selloff in some of the hottest growth stocks in recent years, and the Russian invasion of Ukraine. Bonds were down an equal amount as interest rates rose. As we entered the second quarter, however, fears of a recession began to become the predominant mood for investors and the S&P 500 declined 16.1%. Bonds, finally showing better protective characteristics, only declined 2.4% in the quarter. Turning abroad, international markets did slightly better for the quarter, but are still down 18.4% for the year, similar to the 20% decline here domestically for the S&P 500. Surprisingly, the tumultuous start to the year has provided the worst first half for stocks since 1970. More growth-oriented stocks (i.e. Technology) continued to decline more than value-oriented counterparts (i.e. Financials, Energy) and are now down over 28% this year.

Asset Category	Q2 2022	YTD

U.S. Value Stocks	-12.2	-12.9
U.S. Growth Stocks	-20.9	-28.1

Source: Morningstar Direct. Please see Important Disclosures on page 4 for index definitions.

Inflation continues to be the biggest concern for the economy but there may be signs of easing. Higher prices tend to suppress demand, which lowers prices. In addition, the Federal Reserve has been aggressively raising interest rates to combat it. In response, the housing market has seemed to cool a bit but we are still early in the process. Now, the question has become whether we experience a “soft landing” (i.e. a mild slowdown) or a “hard landing” (i.e. outright recession). Many economists are starting to lean towards the latter and recession fears are starting to steal headlines from inflation. In fact, it sometimes seems a recession is now assumed rather than suspected. As a consequence, valuations are under pressure for many asset classes, including stocks. Not only do you have the specter of slowing growth and downward corporate earnings revisions weighing on stocks, but also bear in mind that higher interest rates have finally made bonds a more viable alternative to stocks. For example, a U.S. 2-year Treasury was yielding 0.5% around last Thanksgiving and now yields roughly 3%.

With recession fears creeping back into the market, we thought it would be helpful to revisit a chart that we included in this letter at the end of 2019. It shows the average bear market decline in the 9 recessions since World War II. When we shared it in 2019, we were encouraging our customers to revisit their asset allocations to be sure they had the appropriate stock/bond mix and risk profile at a time when the market was hitting new highs. Today, we look at it as a way to put what has happened this year into perspective. The market is down 20% (S&P 500) in the first six months of the year, while the average bear market decline is 33% and lasts about a year and a half. If we are in a recession, there could be further downside from here but much of the decline has likely already occurred. More volatility is possible, but can provide great opportunities to add to stocks in preparation for the upcoming recovery.

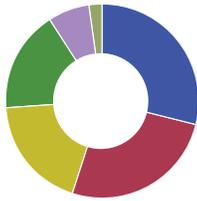

Source: Davenport Asset Management; Morningstar Direct; market returns represented by the S&P 500 Index

Rebalancing accounts at the end of the first quarter proved timely as we were generally increasing cash and bond positions, albeit slightly. We also maintained a position in dividend paying stocks in the more conservative models, which continued to do well in the second quarter. The quality bias of the Vanguard Equity Income, Fuller & Thaler Behavioral Small Cap and FMI Large Cap funds provided some cushion on the downside. The Vanguard Emerging Markets fund was down 9.2% in the quarter, buoyed by the reopening of the Chinese economy which helped those markets do a bit better than the US. On the negative side, large cap U.S. growth funds, American Funds Amcap and William Blair Large Cap Growth, were down about 20% in the quarter. At this point, we think that the huge selloff in some of the largest growth stocks may set up for good returns going forward and these managers remain in the highest quality stocks in that category.

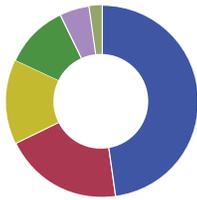

We believe that these are trying times and hope that we will start to see a slowing in inflation, which could ease some of the concerns in the market and could tamp down market volatility. In the meantime, however, please feel free to reach out to your financial advisor at any time.

## Important Disclosures:

In June 2020, the names of the FundAdvisor composites were made due to a rebranding of the program. Maximum Growth composite was changed to Aggressive Growth, the Conservative Growth to Moderate Growth, Balanced to Growth & Income and the Conservative Balanced to Conservative Income.

<sup>1</sup>The Adviser and certain of its affiliates on their own initiative have agreed to waive certain amounts of their respective fees and/or reimburse expenses. Total annual fund operating expenses (excluding acquired fund fees and expenses, interest expense, extraordinary expenses and proxy-related expenses paid by the Fund, if any) paid by the Fund's IS and SS classes (after the voluntary waivers and/or reimbursements) will not exceed 0.57% and 0.82% (the "Fee Limit"), respectively, up to but not including the later of the ("Termination Date"): (a) July 1, 2022; or (b) the date of the Fund's next effective Prospectus. While the Adviser and its affiliates currently do not anticipate terminating or increasing these arrangements prior to the Termination Date, these arrangements may only be terminated or the Fee Limit increased prior to the Termination Date with the agreement of the Fund's Board of Trustees. <sup>2</sup>Hartford Administrative Services Company ("HASCO"), the Fund's transfer agent, has contractually agreed to waive its transfer agency fee and/or reimburse transfer agency-related expenses to the extent necessary to limit the transfer agency fee for Class Y as follows: 0.06%. This contractual arrangement will remain in effect until February 28, 2023 unless the Board of Directors of The Hartford Mutual Funds, Inc. approves its earlier termination. <sup>3</sup>The Fund's investment adviser, Fuller & Thaler Asset Management, Inc. ("Fuller & Thaler" or the "Adviser") has contractually agreed to waive its management fee and/or reimburse Fund expenses so that total annual operating expenses do not exceed 1.30%, 1.80% 1.25%, 0.99%, and 0.90% for A Shares, C Shares, Investor Shares, Institutional Shares and R6 Shares, respectively, of the Fund's average daily net assets through January 31, 2023. <sup>4</sup>Massachusetts Financial Services Company has agreed in writing to bear the fund's expenses, excluding management fees, distribution and service fees, interest, taxes, extraordinary expenses, brokerage and transaction costs, investment-related expenses, and fees and expenses associated with investments in investment companies and other similar investment vehicles, such that "Other Expenses" do not exceed 0.10% of the class' average daily net assets annually for each of Class A, Class B, Class C, Class I, Class R1, Class R2, Class R3, and Class R4 shares, and 0.00% of the class' average daily net assets annually for Class R6 shares. This written agreement will continue until modified by the fund's Board of Trustees, but such agreement will continue until at least September 30, 2022. <sup>5</sup>Investors pay the net expense ratio of the fund. Diversification and Asset Allocation does not ensure a profit or guarantee protection against a loss. It is important to note that short-term and trailing performance will fluctuate. We expect all of the funds at some point to experience underperformance versus their benchmarks and peer groups. However, we believe that our research process has helped us identify funds that are likely to perform well over the long term. Our decision to remove a fund is not based on short-term performance, but on in-depth analysis using our Monitoring Criteria. The mutual fund categories are determined by Davenport using a combination of Morningstar categories and a returns-based style analysis provided by Zephyr StyleADVISOR.

The **Bloomberg Barclays Intermediate Government/Credit Index** is an unmanaged index composed of debt securities with maturities from one to ten years issued or guaranteed by the U.S. Treasury, U.S. Government agencies, quasi-federal corporations and fixed rate dollar denominated SEC-registered corporate debt that are rated investment grade or higher by Moody's Investors Service and Standard and Poor's Corporation or Fitch Investor's Service, in that order. It includes investment grade, U.S. dollar-denominated, fixed-rate Treasuries, government-related and corporate securities. The **BBgBarc US Govt/Credit 1-3 Yr** measures the performance of US Treasury securities that have a maturity ranging from 1-3 years. The **Bloomberg Barclays U.S. Aggregate Bond Index** is a broad-based benchmark that measures the investment grade, U.S. dollar-denominated, fixed-rate taxable bond market, including Treasuries, government-related and corporate securities, MBS (agency fixed-rate and hybrid ARM pass-throughs), ABS, and CMBS (agency and non-agency). The **Bloomberg Barclays U.S. Corporate Bond Index** measures the investment grade, U.S. dollar-denominated, fixed-rate, taxable corporate bond market. The **Bloomberg Barclays U.S. Government Index** includes U.S. dollar-denominated, fixed-rate, nominal U.S. Treasuries and U.S. agency debentures (securities issued by U.S. government owned or government sponsored entities, and debt explicitly guaranteed by the U.S. Government. The **S&P GSCI** is a composite index of commodities that measures the performance of the commodities market.

**An index is not available for direct investment; therefore its performance does not reflect the expenses, fees and taxes generally paid with the active management of an actual portfolio.**

**Risk Considerations:** International funds invest primarily in equity securities of issuers outside the United States. International investments are subject to additional risks such as currency fluctuations, political instability, and the potential for illiquid markets. Funds that invest in foreign securities may involve greater risks, including political and economic uncertainties, as well as risk of currency fluctuations. Investments in emerging markets come with much greater risk due to political instability, domestic infrastructure problems, currency volatility and limited equity opportunities, as many large companies may still be "state-run" or private. Small and mid cap company stocks may be more volatile than stocks of larger, more established companies. Investments in bonds and other fixed income securities may fall in value if interest rates change. Generally, the prices of debt securities rise when interest rates fall, while their prices fall when interest rates rise. Longer term debt securities are usually more sensitive to interest rate changes. An issuer suffering an adverse change in its financial condition could see the credit quality of its securities deteriorate, leading to greater price volatility of the security. Funds investing in lower quality debt securities are more susceptible to these problems and their value may be more volatile.

**Gross Expense Ratio** is the total annual operating expenses of a fund divided by its average net assets. **Net Expense Ratio** is the total annual operating expenses of a fund, less any fee waivers, divided by its average net assets. This is the expense ratio actually charged by the fund for the previous fiscal year. The **mean reversion**, or reversion to the mean, is a theory used in finance that suggests that asset price volatility and historical returns eventually will revert to the long-run mean or average level of the entire dataset.
